

Naloxone – what is it and how to use it.

Naloxone saves lives!

The lifesaving drug comes in 2 forms: nasal spray and injection. **It rapidly reverses the effects of an opioid overdose**, buying valuable time while waiting for emergency services to arrive.

Ask your local service for more information about being trained to use naloxone.

The more people who are trained to use naloxone, the closer we get to ending overdose.

Carry #naloxone and give it to the person in need, inform emergency service that naloxone has been given.

#EndOverdose
